

## COMMANDS

### PURPOSE

Symbolic name for DATAPLOT's commands file. It is used with the SEARCH and LIST commands.

### DESCRIPTION

DATAPLOT's command file contains an alphabetic list of all DATAPLOT commands with a brief (one line) description. It is a subset of the dictionary file. The dictionary file also includes macro files, program files, and data files.

### SYNTAX

None

### EXAMPLES

```
SEARCH COMMANDS PLOT
LIST COMMANDS FOR I = 1 1 35
```

### NOTE

The COMMANDS file is stored in the DATAPLOT directory. It has the name COMMANDS (or commands for Unix systems). The exact file name and the directory where it is stored can vary depending on the installation (see your local DATAPLOT implementor to find the exact name on your system).

If DATAPLOT is unable to open the command file, it is most likely because the directory name is not specified correctly in the local DATAPLOT code. See your local DATAPLOT implementor to have this corrected.

### DEFAULT

None

### SYNONYMS

None
