## CHEBT

PURPOSE
Compute the Chebychev polynomial of the first kind and order N .

## DESCRIPTION

From Abramowitz and Stegum (see REFERENCE below), a system of nth degree polynomials $f_{n}(x)$ is called orthognal on the interval $\mathrm{a}<=\mathrm{x}<=\mathrm{b}$ with respect to a weight function $\mathrm{w}(\mathrm{x})$ if it satisfies the equation:

$$
\begin{equation*}
\int_{a}^{b} w(x) f_{n}(x) f_{m}(x) d x=0 \quad m, n=0,1,2, \ldots,(n \neq m) \tag{EQAux-68}
\end{equation*}
$$

Chebychev polynomials of the first kind use the weight function $\left(1-\mathrm{x}^{2}\right)^{(-1 / 2)}$ and are orthogonal on the interval $(-1,1)$. They are also defined by the following equation:

$$
\mathrm{T}_{n}(x)=\cos \left(\mathrm{n}^{*} \arccos (x)\right) \quad-1 \leq x \leq 1
$$

(EQ Aux-69)
DATAPLOT calculates the Chebychev polynomials using the following recurrence relation:

$$
\begin{equation*}
\mathrm{T}_{n}(x)=2 x \mathrm{~T}_{n-1}(x)-\mathrm{T}_{n-2}(x) \tag{EQAux-70}
\end{equation*}
$$

where the first few terms for the recuurence were obtained from the Handbook of Mathematical Functions (see the REFERENCE below).

## SYNTAX

$$
\text { LET }\langle\mathrm{y}\rangle=\text { CHEBT }(<\mathrm{x}\rangle,\langle\mathrm{n}\rangle) \quad \text { <SUBSET/EXCEPT/FOR qualification> }
$$

where $\langle x\rangle$ is a number, parameter, or variable in the range $(-1,1)$;
$<\mathrm{n}>$ is a non-negative integer number, parameter, or variable that specifies the order of the Chebychev polynomial;
$\langle y\rangle$ is a variable or a parameter (depending on what $\langle x\rangle$ is) where the computed Chebychev polynomial value is stored; and where the <SUBSET/EXCEPT/FOR qualification> is optional.

## EXAMPLES

LET A $=$ CHEBT $(-1,4)$
LET X2 $=\operatorname{CHEBT}(\mathrm{X} 1,10)$
LET X2 $=$ CHEBT $(\mathrm{X} 1-0.2, \mathrm{~N})$

## DEFAULT

None

## SYNONYMS

None
RELATED COMMANDS
CHEBU $\quad=\quad$ Compute Chebychev polynomial second kind, order N .

CHEB0 $\quad=\quad$ Compute Chebychev polynomial first kind, order 0.
CHEB1 $=\quad$ Compute Chebychev polynomial first kind, order 1.
CHEB2 $=\quad$ Compute Chebychev polynomial first kind, order 2.
CHEB3 $\quad=\quad$ Compute Chebychev polynomial first kind, order 3.
CHEB4 $\quad=\quad$ Compute Chebychev polynomial first kind, order 4.
CHEB5 $\quad=\quad$ Compute Chebychev polynomial first kind, order 5.
CHEB6 $\quad=\quad$ Compute Chebychev polynomial first kind, order 6.
CHEB7 $=\quad$ Compute Chebychev polynomial first kind, order 7.
CHEB8 $\quad=\quad$ Compute Chebychev polynomial first kind, order 8.
CHEB9 $\quad=\quad$ Compute Chebychev polynomial first kind, order 9.
CHEB10 $\quad=\quad$ Compute Chebychev polynomial first kind, order 10.
