

REGIS COLORS

PURPOSE

Assign the active colors for a Regis graphics device.

DESCRIPTION

Regis color devices support 64 colors. However, only 4 (for VT-240 class terminals) or 16 (for VT-340 class terminals) colors can be active at a given time. This command allows the analyst to specify the active colors.

SYNTAX

REGIS COLORS <color> <index>

where <color> is a character string that specifies the desired color;

and <index> is an integer number or parameter between 1 and 16.

EXAMPLES

REGIS COLORS SHOW

REGIS COLORS RED 4
